REACH (Regulation (EC) No 1907/2006) Compliance Statement

As a manufacturer of industrial lubricants based in the European Union, Interflon confirms that we are fully committed to complying with the requirements of the REACH Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals.

We ensure compliance through the following actions:

All substances used in our formulations have been either:

Registered by ourselves or our upstream suppliers, or are exempted from registration under the conditions of REACH (e.g., polymers, substances in quantities below 1 tons/year, or substances already registered for that use).

We work closely with our suppliers to ensure that all raw materials used in our products are sourced from REACH-compliant supply chains.

Our Safety Data Sheets (SDS) are kept up-to-date and prepared in accordance with REACH Annex II requirements, including relevant information on registration numbers, classification, and safe use.

Where applicable, we monitor and comply with REACH restrictions (Annex XVII) and authorization requirements (Annex XIV). None of our products contain substances subject to authorization unless explicitly stated in the product documentation.

At present, none of our finished lubricant products are intentionally formulated with Substances of Very High Concern (SVHCs) above the threshold of 0.1% w/w, as per the current Candidate List published by the European Chemicals Agency (ECHA). If an SVHC is present, this is communicated transparently in the SDS and technical documentation. We continue to monitor REACH developments closely to ensure ongoing compliance.

In case you have questions concerning this statement/announcement/declaration or questions of any kind please do not hesitate to contact your local Interflon distributor.

Your nearest distributor can be found on <https://interflon.com/contact>.

Sincerely yours,

Interflon B.V.
